

# Global Warming Demystified

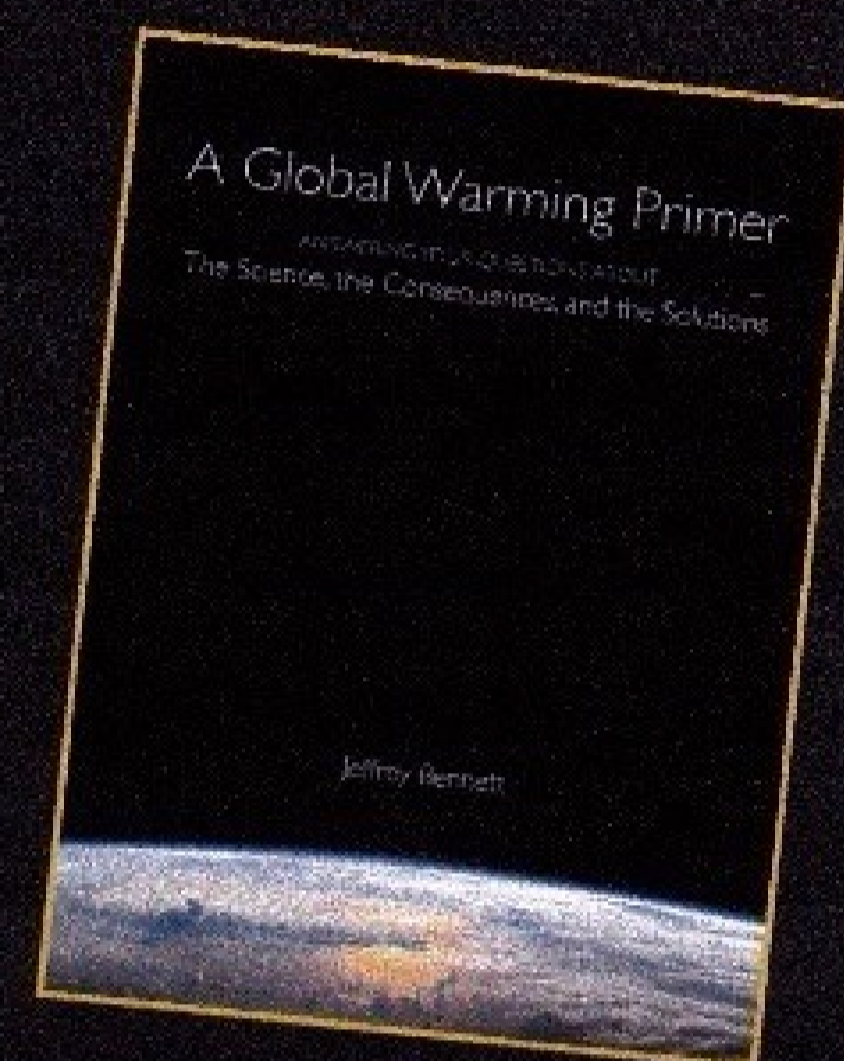

Join us for an evening with *PLHS Hall of Fame member*

## Jeffrey Bennett

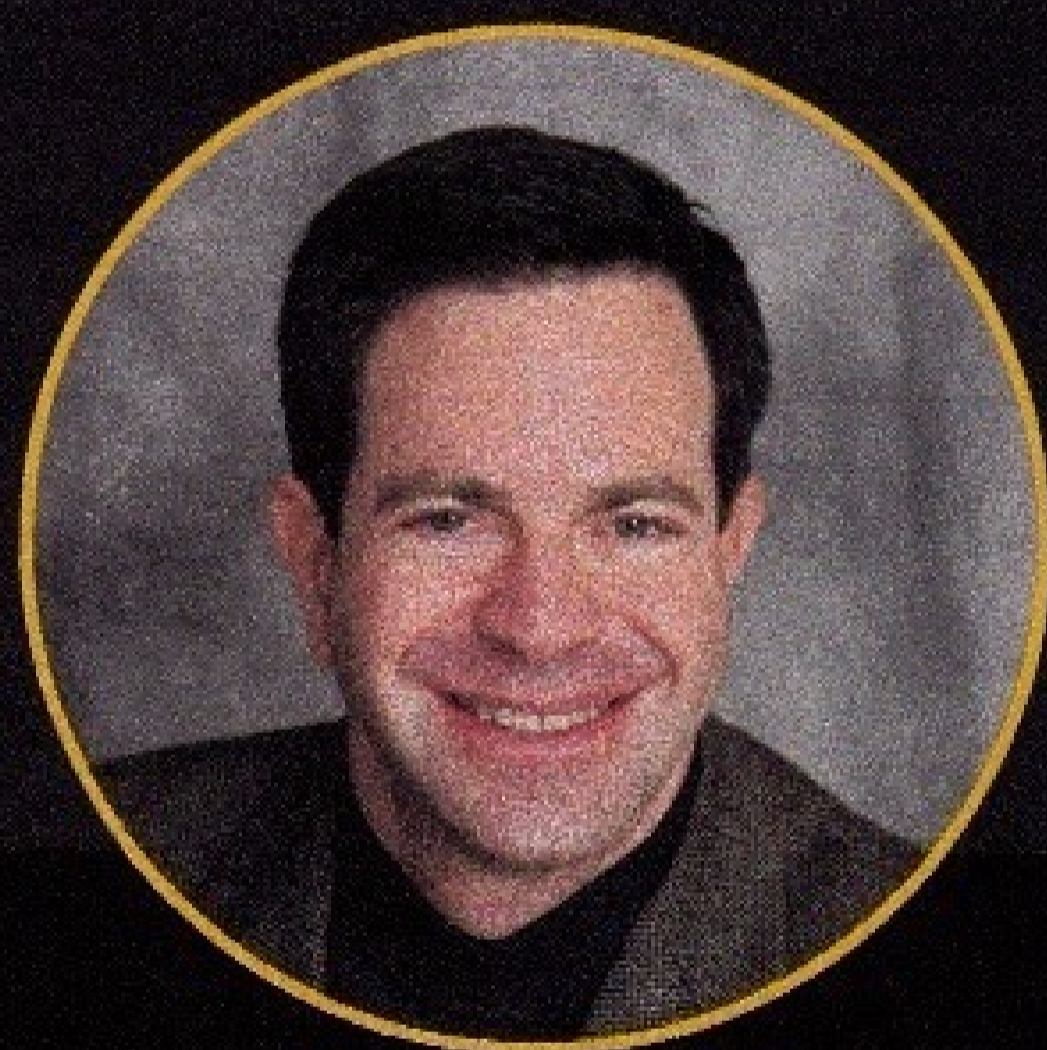

ANSWERING YOUR QUESTIONS ABOUT

### The Science, the Consequences, and the Solutions

Do you have questions about the science or reality of global warming? This presentation by noted educator Jeffrey Bennett should answer them, while showing that the solutions to this important problem are ones that people of all political persuasions can agree on. The level is suitable for middle school age and up, and draws from Dr. Bennett's book *A Global Warming Primer*.

**Jeffrey Bennett was inducted into the  
PLHS Hall of Fame in 2015**

Astrophysicist/author **Jeffrey Bennett**, winner of the American Institute of Physics Science Communication Award, has been teaching about global warming for more than 30 years. He is the lead author of college textbooks in astronomy, astrobiology, mathematics, and statistics, of five critically acclaimed books for the general public, and of a children's series selected as the first books to be read aloud from the International Space Station for "Story Time From Space."
